

◆ "John Henley's knowledge of the Lawson system and his wide range of technical skills make John an important part of our implementation and support team. John has been a key resource for reconciliations between Lawson modules and a positive interface between Watson Wyatt and Lawson support. John has also played an important role in our custom report development, not only by providing detailed design requirements, but also by reviewing other developer's code and suggesting changes that have resulted in a dramatic increase in report performance."

"We plan to continue using John Henley as a resource on our team."

-- Patti Crooke, Manager Financial Systems

A global consulting firm, Watson Wyatt Worldwide brings together two disciplines - people and financial management - to help clients improve business performance. We provide consulting services in the areas of employee benefits, human resources technologies, and human capital management.
